Statement of Policy

At JMS Tradewell International Private Limited, we are committed to developing the business operation in accordance with the principle of sustainable development. By identifying the areas we can influence, and making steps towards implementing changes, we aim to ensure we play our part in preserving the environment for future generations.

By its very nature JMS Tradewell International Private Limited is a low carbon company. The processes through which we manufacture our products comply with the environmental regulations imposed by local authorities and also to international standards.

- We fully agree with the principle of reduce, reuse and recycle. We use electronic communications within the organization and with clients to minimize the use of paper. We aim to make our booking system paperless and where possible most records are kept on systems rather than paper files.
- We are working to reduce travel to work by adding busses for labor and promoting car sharing in order to reduce individual travel hence reducing carbon emission.
- We are working to reduce our emissions at work and have installed energy efficient lighting.
- We aim to build an integrated approach so that environmental improvements in one area do not have a negative environmental impact on other areas of business operation.
- To regularly provide information and communication to staff to promote an awareness of the Environmental Policy and encourage a sense of environmental responsibility. Where areas for improvement are identified, we will work to implement updates and changes, as necessary.
- We are cautious about pollution caused by noise and water. Therefore necessary arrangements are made that are constantly checked and updated.

We recommend and ask all of clients and affiliated individuals to take care of the environment and ask others to do the same.
